Durable **LAMINATED PIEZO PRINT HEAD** optimises print speed and helps support your everyday printing.

Laminated Durable Piezo Print Head

Brother original Lamination Technology is optimised for undisrupted high-volume and high-speed printing.

It allows the use of stainless steel elements for lamination of the print head.

The use of stainless steel also protects the print head and guards against corrosion from ink, giving the print head a longer lifespan.

Meanwhile, Piezo Technology minimises repair and replacement costs, saving you money and time with every print.

It uses piezoelectric elements to mechanically propel the ink out through the nozzle for precision control. Piezo Technology delivers safer, low temperature operation that reduces the risk of the print head wearing out.

Protect your pocket and improve efficiency with affordable super high yield **InkBenefit** cartridges.
